

**Ideal Comfort Diffusers
IKD**

Heating

Cooling

DESCRIPTION:

Electrically or manually adjustable diffusers are required for cooling and heating large halls.

In order to prevent draughts in the cooling mode, the supply air must largely be discharged horizontally from the diffuser.

In heating mode, however, the diffuser must have high penetration depth, in order to achieve fast and efficient heating.

The diffuser type IKD meets both these requirements with either a manual or electric adjustment. It ensures optimum air distribution in cooling and heating modes.

IKD-S : Diffuser with adjustable air pattern.

IKD-M : Diffuser with adjustable air pattern and motor

IKD-AY : Diffuser with adjustable air pattern and adjustable neck. IKD-PL : Diffuser with adjustable air pattern and plenum box

MATERIAL :

Galvanized sheet metal

FUNCTION :

IKD type diffuser used for installation at heights of 4-15m in exhibition, sport and production halls.

IKD diffuser can be used for both heating and cooling applications. Round design with outer casing and adjustable inner basket to change air flow direction. Adjustment can be done manual or with motor. The free cross section is not changed when adjusting outlet direction, Pressure loss and noise level remain the same in all diffuser settings.

FINISHING :

- Powder coated in RAL9010 colour as standard. Other colours on request

INSTALLATION :

- Screw
- No Fixing

ACCESSORIES:

- Plenum box

STANDARD SIZES (mm):
